SPECIAL ANNOUNCEMENT:
PURSUING AN INDEPENDENT FIELD TRIP for PAPER #1
THE CHARLES RIVER or the BOSTON HARBOR ISLANDS

This message is to all students of the Environmental Management 1 class who did not attend the Cape Cod field trip on October 6th, and who have not already sent me an alternate field trip proposal and/or paper topic. This includes distance students and in-class students, as well as graduate students and undergraduate students who fall into this category.

For those of you who might be interested in visiting either of these two sites, here are some websites that might help you decide where to go and what to write about. I found these links using www.google.com.
