Greetings from the Environmental Management II Instructors and Teaching Assistants:

This week's lecture presentation from Harvard Hall is now online in streaming audio-video format with synchronized slides. Follow the links below to view the current lecture and assignments.

PASSWORD ACCESS for REGISTERED STUDENTS:

http://lab.dce.harvard.edu/extension/environment/passwords.html

Passwords are required to access streaming audio-video lecture presentations beginning with week 03.

Registered Harvard students of Environmental Management are authorized to view the materials during the current semester. After selecting the appropriate video link, a popup window (see above) will prompt you to enter a user name and password.

For USER NAME, enter your Harvard University ID (HUID) number. It is typically an 8-digit number that begins with '001'. This number was assigned to you by the Registrar and appears on your registration confirmation. All students should have received this information by mail. (This letter has information about the computer accounts which are available to registered students.) If you are a Harvard employee, please note that the HUID # is NOT the same as your employee number. It is also not the same as any Harvard PIN you might have, such as the one used for DCEWEB.

For PASSWORD, enter your last name (all lowercase letters). Only eight (8) characters are allowed, so if your name is longer (i.e. Washington), use only the first 8 letters (washingt).

If you have not received, or cannot locate, your HUID you can contact the Registrar's office.

WEEK 05

Energy - Part I
Petros E. Koutrakis, PhD

Professor Koutrakis begins by discussing the impact of global population growth on energy demand. Per capita energy consumption both past and present is explored. The uses of energy are detailed with a focus on transportation. Energy sources and the supply of fossil fuels are reviewed including oil, natural gas and coal. The extensive use of coal in the United States for electrical power generation and the impact on public health is outlined. Dr. Koutrakis concludes the lecture with a review of the future consumption and availability of energy and the global energy pressures and issues we face in the 21st century.
